Product Portfolio

Power

EEX is the leading exchange platform in the European power market and as EEX Group (in conjunction with Nodal Exchange and EPEX SPOT), recorded the largest power trading volume worldwide in 2018. The power spot market for Austria, Belgium, France, Germany, Great Britain, Luxembourg, the Netherlands and Switzerland is operated by EPEX SPOT. Power products which are settled on the same day (Intraday) or on the following day (Day-ahead) can be traded. The offer is supplemented by Trade Registration services.

On the power derivatives market of EEX, financial and physical futures on power can be traded for 17 European power markets across Europe. At EEX, traders have access to the most liquid financial power future contract in Europe – the Phelix-DE Future.

In the US power market, Nodal Exchange offers over 1,000 contracts across hundreds of unique locations, providing the world’s largest set of electric power locational (nodal) futures contracts.

Environmental Markets

EEX is the only exchange in Europe experienced in regular and large-scale primary market auctions for emission allowances on the spot market.

In cooperation with IncubEx, EEX runs a secondary market for continuous trading of EU ETS allowances (EUA, EUAA) and Kyoto credits (CER).

Nodal Exchange launched North American Environmental contracts to meet the growing need for this market. The offering includes emissions and renewable contracts.

Global Commodities

EEX Group launched the Global Commodities business to support and enable customers to trade and clear a broader portfolio of products from a global perspective via both EEX and our Singaporean arm, EEX Asia. The Group’s offering comprises contracts on freight, fuel oil, iron ore and wood pellets.

Agricultural Products

The agricultural offering comprises financially settled derivatives contracts on dairy products (butter, skimmed milk powder, whey powder and liquid milk) and European processing potatoes. These products are available for order book trading and trade registration.

Natural Gas

The natural gas spot and derivatives markets of EEX Group are operated by Powernext under the “PEGAS” brand. The trading platform covers spot and derivatives market products for 12 gas hubs in 9 European countries. In addition, trading in location and time spreads is offered. Additionally, Nodal Exchange offers a Henry Hub natural gas contract.

In 2019, financially-settled LNG contracts will be introduced on the PEGAS platform.

Clearing Services

Secured clearing and settlement of all transactions is provided by EEX Group’s clearing houses, European Commodity Clearing (ECC) and Nodal Clear in the US. Our clearing houses also assume clearing as well as physical and financial settlement of transactions concluded and registered for clearing on all partner exchanges.

Registry Services

Powernext offers registry solutions for Guarantees of Origin in France, as well as Capacity Guarantees for the French TSO RTE and the Energy Savings Certificate mechanism.

In 2018, EEX announced the 100 % acquisition of Grexel Systems Oy, the leading energy certificate registry provider in Europe. The company currently operates 15 energy certificate registries in Europe.

Market Data Services

Market data services offer fast and robust data directly from the source via API, Desktop App, Excel Tools and SFTP. EEX Group DataSource services provide access to data for all tradable commodities of the EEX Group exchanges, as well as transparency data.

In 2018, EEX announced the 100 % acquisition of Grexel Systems Oy, the leading energy certificate registry provider in Europe. The company currently operates 15 energy certificate registries in Europe.
European Commodity Clearing is the central clearing house for energy and related products in Europe.

- Clearing assures the fulfilment of each contract concluded or registered on the exchanges, providing security for the customers.
- Managing risk is an essential function of ECC, a central counterparty (CCP) licensed under strict European financial market regulations for CCPs (‘EMIR’).
- In addition, ECC holds the status as a Recognised Clearing House (RCH) in Singapore, regulated by the Monetary Authority of Singapore (MAS).

Clearing & Settlement Services

- Physical settlement (delivery)
- Financial settlement (payment)
- Risk management services
- Straight-Through Processing services
- Reporting services

ECC – Clear Benefits

- ECC has a unique level of expertise in the physical settlement of grid-bound energy (power & natural gas) and energy related products (emission allowances).
- Customers benefit from cross-margining effects across different partner exchanges and commodities.
- In addition to clearing for exchange transactions, ECC offers Straight-Through Processing (STP) services for Trade Registration.

www.ecc.de

Nodal Clear is the US clearing house of EEX Group.

- Serves as central counterparty for all Nodal Exchange transactions.
- Nodal Clear is a derivatives clearing organisation (DCO) regulated by the US Commodity Futures Trading Commission (CFTC).
- Employs a tailored portfolio margining methodology that appropriately margins contracts and provides superior capital efficiencies.
- Currently accepts cash and letters of credit in US Dollars (USD) as market collateral.
- Straight-Through Processing (STP) service for Trade Registration.

electric power volume cleared by ECC in 2018

1,038.6 TWh
electric power volume cleared by Nodal Clear in 2018
In order to trade on EEX Group markets, companies need to pass the admission process at the respective exchange. Proper settlement and collateralisation of transactions require the recognition by the respective clearing house.

**How to become a trading participant?**

- Admission by the respective exchange
- Recognition by the clearing house
- Technical connection

**Technical access to trading at EEX Group**

**Available trading and clearing front-ends:**
- Eurex Clearing GUI
- Eurex T7 GUI
- EEX TT Screen
- M7 Auction
- Trayport Joule Front End
- EPEX SPOT Trader Client
- Gas Direct Screen
- Nodal LiveTrade
- Nodal T7 Trading Platform (powered by CQG)
- ISV (third-party front-ends)

EEX Group exchanges offer various training courses which are available through high quality media.

EEX Group provides multiple connectivity options to access its markets via a number of front-ends. Each access type is designed for simplicity and compatibility with the Trayport systems or in-house solutions. Depending on the individual requirements, customers can select the right solution from various front-end alternatives. Connection is possible via VPN, internet or leased line according to individual requirements.
Market Data Services

EEX Group DataSource is the high-speed connection to EEX Group market data and to transparency data for the energy market.

Our Services

- EEX transparency data cover the markets for Power, Natural Gas, Environmental Products and Renewables.
- Additional services are offered, such as ad-hoc messages.
- Customised indices & settlement prices.
- Various connectivity alternatives are available providing real-time, delayed and end-of-day data.
- State-of-the-art API, Desktop App, Excel Tools and SFTP.

Regulatory Services

Our reporting services offer EEX Group customers a single point of contact for collecting, submitting and monitoring trading data across different regulations.

Facility and Business Inside Information

The EEX Transparency Platform is an effective solution for the timely disclosure and forwarding of inside information for all market participants.

- The EEX Transparency Platform is the central platform which fulfills disclosure obligations as required by REMIT, MAR and EU Transparency, across various commodities in Europe.

- www.eex-transparency.com

We support customers in fulfilling MiFID II/MiFIR, EMIR, REMIT, EU Transparency Regulation and MAR reporting obligations.

Reporting Services

- REMIT transaction reporting for trading participants (EEX, EPEX SPOT, Powernext).
- EMIR trade reporting for clearing and non-clearing members.
- MiFID II/MiFIR Position and Transaction Reporting:

EEX Group operates exchange markets and supports anonymous and fully electronic trading, providing first level support to trading participants.

Market Operation Services are the heart of exchange trading.

The Market Operation departments of EEX Group are the heart of the exchanges. They operate the platforms on which trading participants can buy and sell energy and commodity products. The Market Operation teams are the first point of contact for all questions relating to day-to-day business, products and trading systems. The mission is to ensure fair market prices and to prevent wrong market signals.

- **Power**
