Products in Detail

API

Your Advantages

- > Highspeed access
- > Standardised interface
- > Automatic data publication
- > Embeddable in any application

How to connect

- > Easy webservice access
- > Compatible with every operating system
- > Automatic or manual access
- > Subscription for individual modules available

Various commodities and transparency data available in standardised modules

Key Features

Frequency:

Choose between real-time and delayed data.

Commodity Data:

EEX Group trading and order book data available in xml and json file format.

EEX Transparency Data:

Obtain original transparency data for Power and Gas from the EEX Transparency Platform. Get prompt information on planned and unplanned outages of physical assets.

Great Depth of Data:

Access commodity and transparency data for many countries from one source.

Desktop App

Your Advantages

- > Real-time data easy to visualise, track and analyse
- > Automatic data import
- > Provides the clarity necessary to make the right decisions
- > Default screens with default presets for commodity-specific views
- > Dynamic charts, graphs and tables

How to connect

- > Easy access via App download
- > Download of application file via EEX website
- > Compatible with various operating systems

Ready-to-use default screens provide instant access to commodity data.

Key Features

Frequency:

Connect to real-time commodity quotes in a spreadsheet-style grid.

Commodity Charting Software:

Use dynamic charts with real-time streaming or historical prices.

Access sophisticated technical studies and trend analysis with Fibonacci retracements, Gann angles, trend channels and more.

Real-Time Forward Curve Construction:

Create, validate and automate the generation of both simple and complex graphs.

Historical Commodity Data:

Access historical commodity data by tick, intra-day, daily, weekly, monthly, seasonal and annual time series.

Options Analytics:

View options for an underlying futures contract, including the Greeks.

View theoretical values as well as both real-time and user-defined volatilities.

Choose from the Black or Black-Scholes model and configure other user preferences for options modeling.

Messaging:

Receive real-time alerts.

Excel Tool

Direct access to transparency data of the EEX transparency Platform for

10
countries

Your Advantages

- > Real-time data display
- > Tailor-made design and selection of data
- > Automatic data import
- > Excel analytics

How to connect

- > Easy access via plug-in
- > Direct download of plug-in from EEX Website
- > Accessible online as well as offline

sFTP

Your Advantages

- > Access to standardised csv and xlsx files on a secured ftp server
- > Daily updates at the end of the day
- > Provision of aggregated data
- > Trade-specific end-of-day data files including all trades of the day
- > Subscription for individual modules available

How to connect

- > Easy access via browser or ftp client
- > Automatic and manual access

Key Features

Frequency:

Choose between end-of-day trade data and aggregated data.

Trade-specific Data:

Access current and historical commodity data including trade-specific market data. Every single trade of the day is included in an end-of-day file.

Aggregated Data:

Access current and historical commodity data including aggregated prices and volumes of the day as well as settlement prices.
