EEX USER GUIDE – EEX JOULE SET UP

Market Operations
09.08.2024

Ref. 1.0

1. Introduction

This user guide is intended to provide you with an overview of the technical background necessary to run Trayport Joule Direct application on your device, with an efficient connectivity guide.

Trayport Joule stands as the comprehensive software solution designed specifically for facilitating seamless and efficient trading activities. With Trayport Joule, you have at your disposal a powerful tool that streamlines and enhances your trading experience. Whether you are a seasoned trader or just starting, this software is tailored to meet the diverse needs of traders engaged in commodities trading. Its robust capabilities encompass everything from market analysis to execution, offering a holistic solution that caters to the intricacies of trading within this specialized market.

This guide is carefully made to help you use the Trayport Joule software. It gives you clear and easy instructions on setting up and connecting to the platform. It is important to start using the software smoothly, so we made sure this guide is designed with that in mind.

The prerequisites to install this application are:

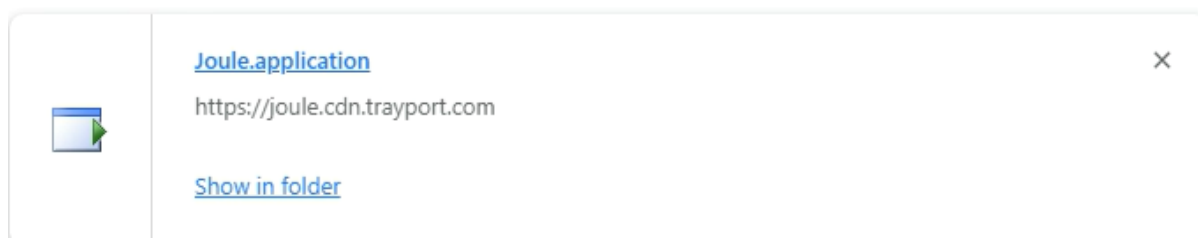

Specifications		Operating System	.NET Framework	CPU	RAM Available to Joule	Graphics Card (GPU)
	Recommended Joule is capable of delivering optimal performance	Microsoft Windows 10 (64-bit)	Version 4.8 or later.	2.66 GHz or above with 6 cores and 12 threads.	More than 2GB available to Joule and more than 25% of the machine's RAM available at all times.	Better than NVidia NVS 310 video card.
	Minimum Joule performance may suffer. Trayport recommends upgrading any components that fall in to this category	Microsoft Windows 8.1 (64-bit)	Version 4.8.	2.66 GHz with 4 cores.	2GB available to Joule and more than 25% of the machine's RAM available at all times.	NVidia NVS 310 video card.

2. Installation

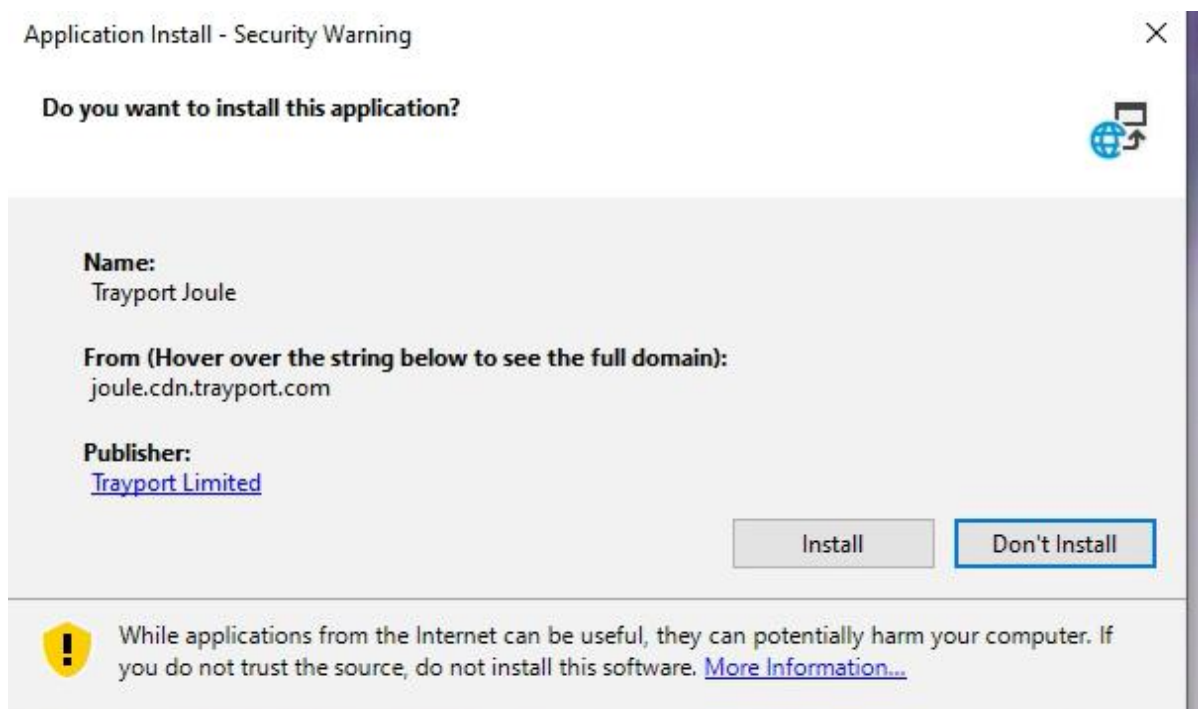

To initiate the setup process, simply click on the provided link below. This will direct you to a window to configure your system and get started with Trayport Joule

<https://joule.cdn.trayport.com/joule/593433d6-47a0-e111-b5f3-00155d03ae7c/050976ab-2691-469e-ab73-fe44d0fbdee3/AnyCPU/Joule.application>

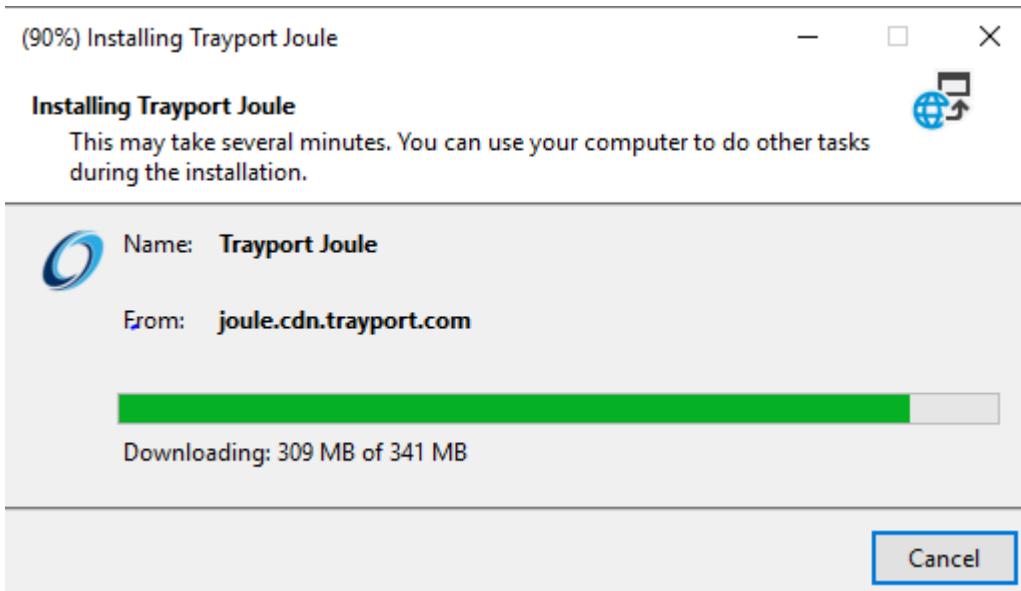

➤ Click on Joule.application

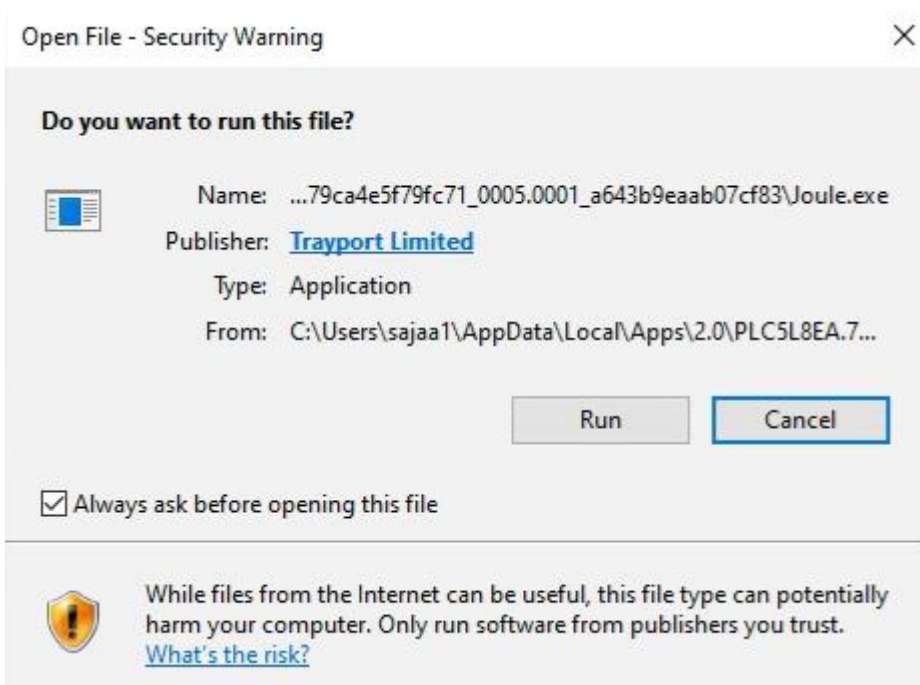

➤ click on “install”

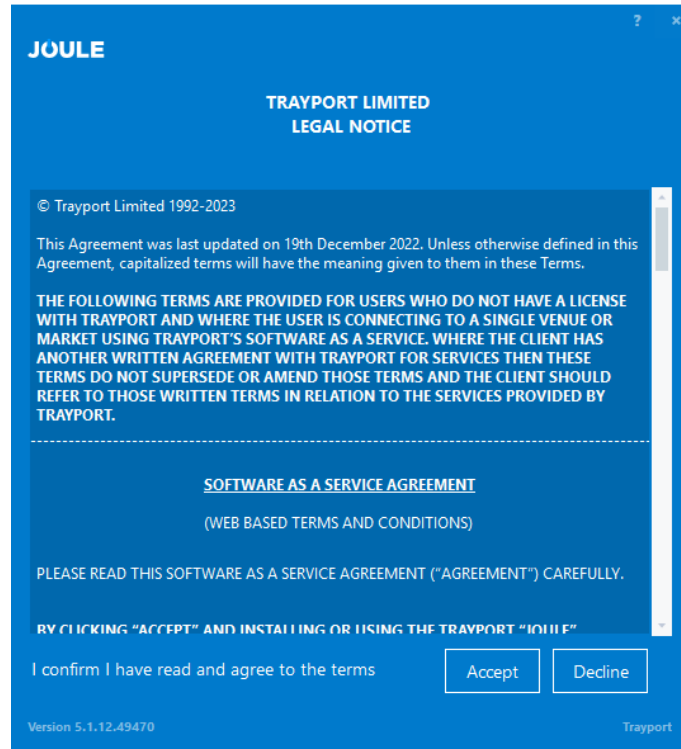

➤ Then you will have the following installation window

➤ Run the file to execute it

➤ **Launch the shortcut to Trayport Joule and accept the Legal Notice**

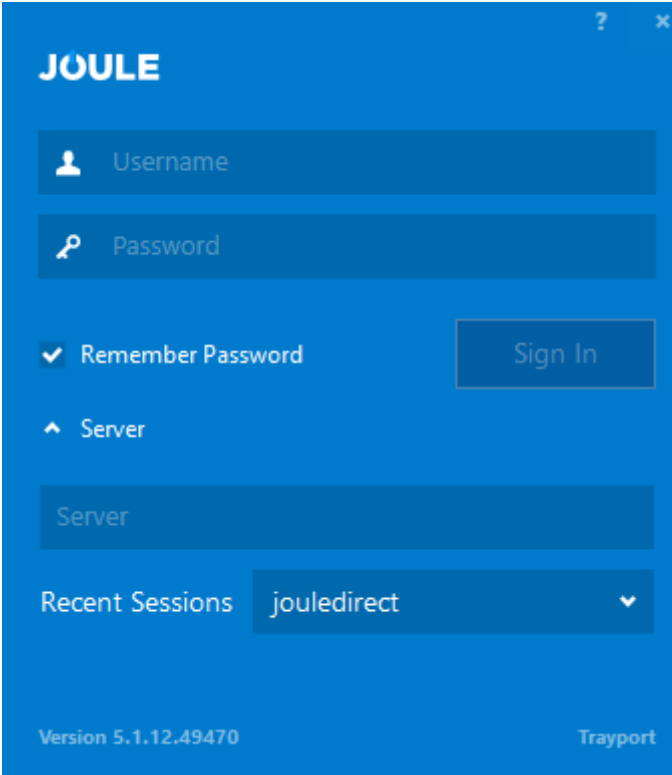

You are now done with the installation of Trayport Joule Direct.

3. Connection

The image below showcases the application's connection window. To begin the connection process, enter your credentials, including your username and password, along with the server name which is **gastrading.eex.com:443** if you trade only EEX Spot, or **jouledirect** if you trade both Spot and Derivatives.

This information is crucial for establishing a secure and successful connection to the Trayport Joule platform. Refer to the screenshot for a visual guide on where to input these details, ensuring a smooth initiation of your trading activities.

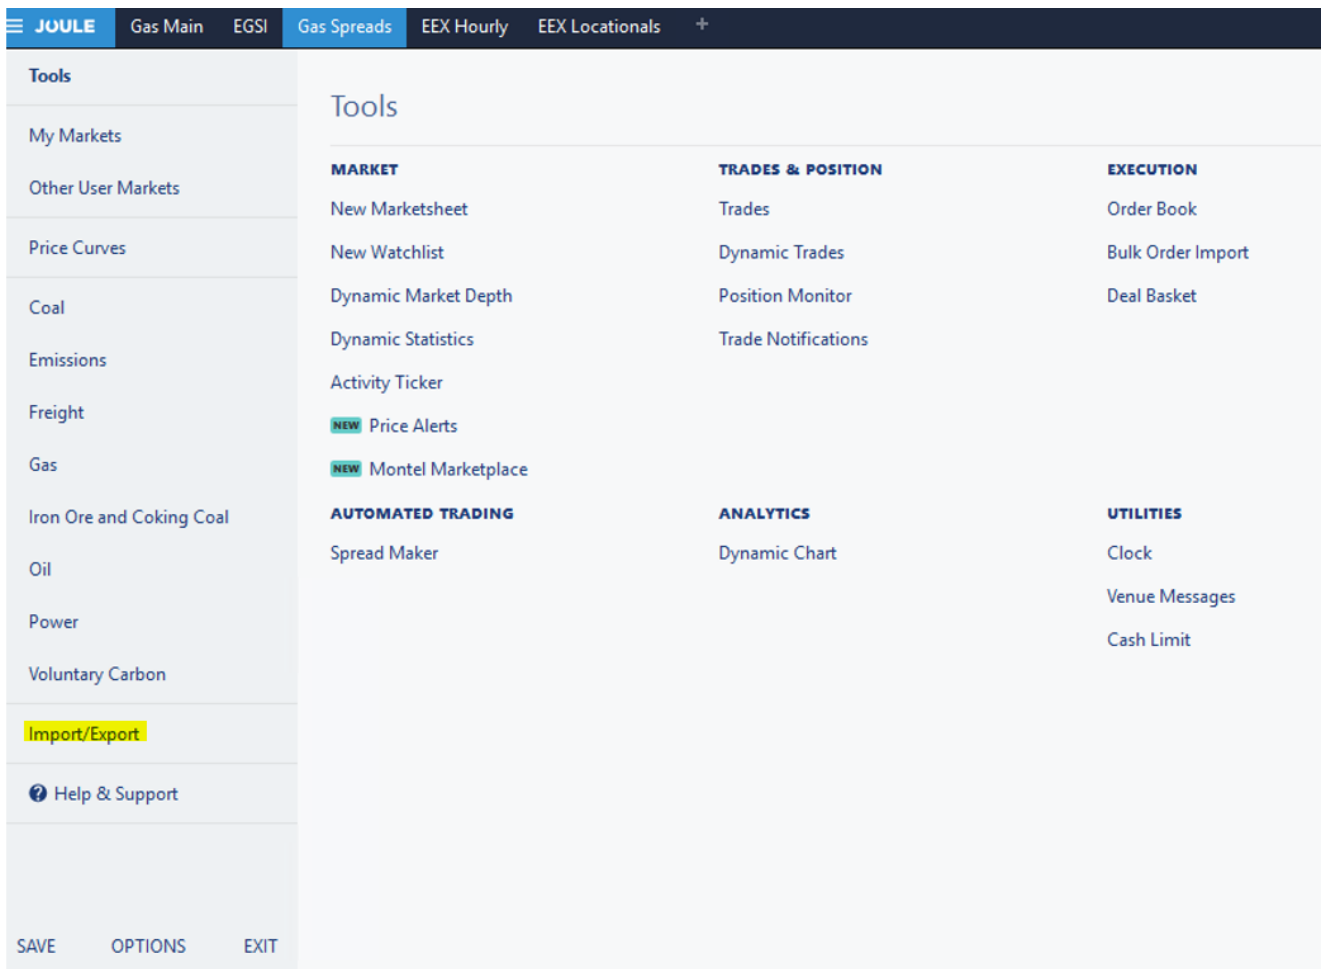

The screenshot shows the 'JOULE' application window. It features a blue background with white text and icons. At the top left, the word 'JOULE' is displayed in white. Below it, there are two input fields: 'Username' with a person icon and 'Password' with a key icon. To the right of the 'Remember Password' checkbox is a 'Sign In' button. Below these fields is a 'Server' dropdown menu with an upward-pointing arrow. The 'Server' dropdown is currently set to 'jouledirect'. At the bottom left, the version number 'Version 5.1.12.49470' is shown, and at the bottom right, the 'Trayport' logo is visible.

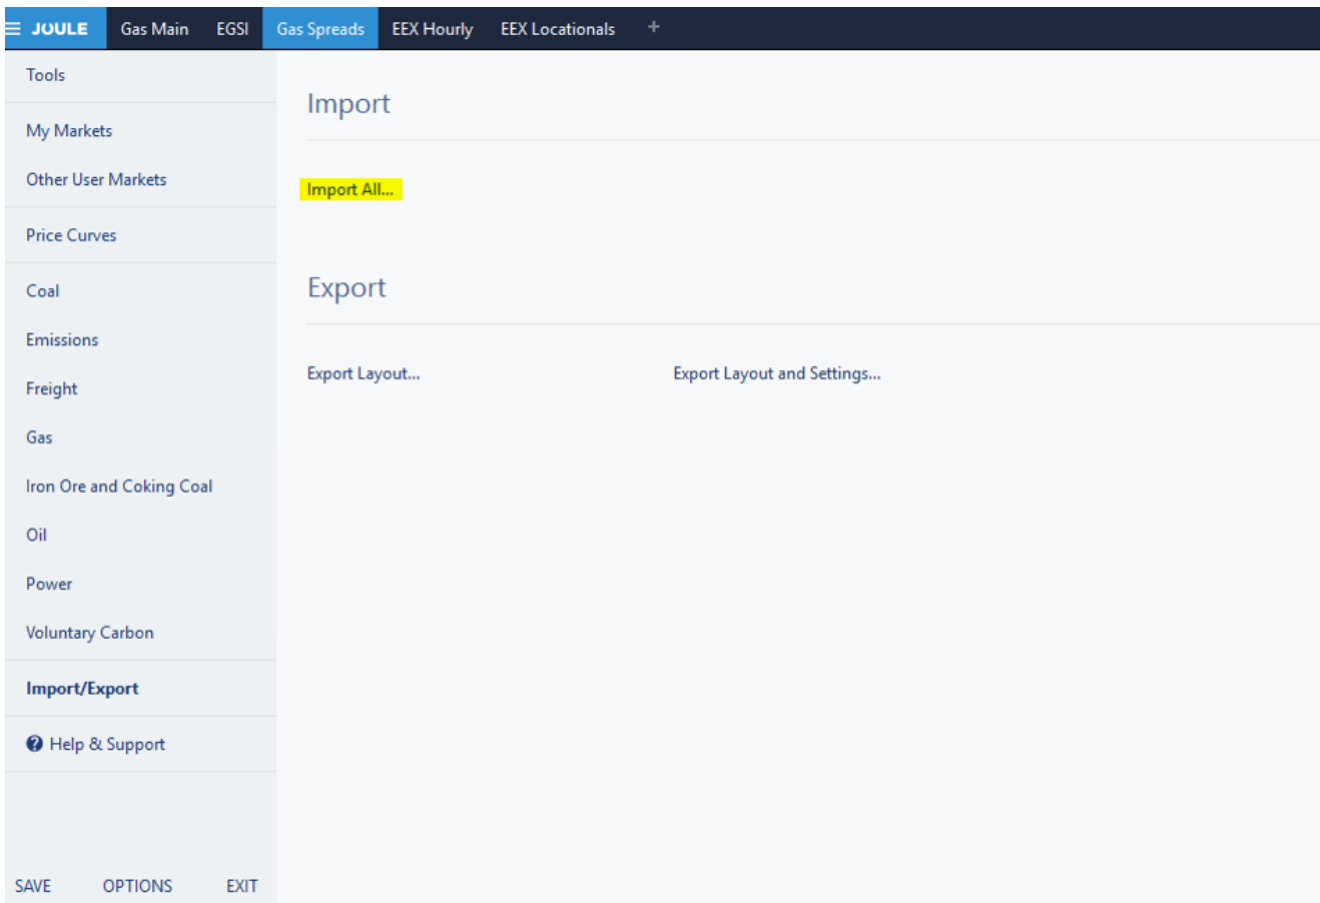

Your credentials should have been provided to you by EEX Gas Market Operations team. If not, please contact us at gas@powernext.com or +33 1 73 03 96 24.

➤ **Import the 'EEX Joule' template**

Click on the Joule main menu on the upper left side, then Import/Export.

Then click on Import all...

You should have received the link to EEX Joule template (EEX Joule template.jgsp file) in your welcome/new front end email. Please choose this file in the import menu.

 Joule for Spot template.jgsp

Once the template imported, you will see the below Trayport Joule Direct window, with an extensive setup with all of our different products for EEX Gas trading. You will be able to customize your template after having imported it.

The screenshot displays the EEX trading platform interface for Gas EEX (50). The main window shows a detailed market data table with columns for various contract types and time periods. The table includes columns for Bid, Ask, Last, and Time for multiple contracts, such as TTF HI Cal 51.6, THE, PEG, CEGH VTP, NBP, and ZTP. Below the main table, there are sections for 'Gas EEX (50) Gas Spreads (51)', 'Trades - (109668)', and a detailed trade list with columns for Trade ID, Date/Time, Product, Period, Price, Quantity, Buyer Company, Seller Company, and Broker Code.
