

## Q&A on Japanese Power Derivatives central limit order book

### 1. Who can access and participate in the central limit order book?

*Access to the order book can be granted for Clearing Members, Trading Brokers, Direct Participants (NCMs), and first-layer agency clients.*

### 2. How to get access to the order book?

*Viewing rights will be enabled for all Clearing Members, NCMs, Brokers, and Agency Clients who are Touchpoint users.*

*If you're looking to get involved in the order book and place orders, here are the access rules you'll need to follow:*

**Clearing Members:** *Order book will be enabled automatically*

**NCMs and Trading Brokers:** *Please contact the EEX Asia Touchpoint Support team with the names of Touchpoint users and specify the type of rights the users should have. Access will then be enabled by the team.*

**Agency Clients:** *Please contact your Clearing Member or NCM partner in order to request access on your behalf from the EEX Asia Touchpoint Support team. No direct request is possible.*

*To participate in the Japanese Power Central Limit Order Book, please ensure that you are connected to the external front end (ISV) of your choice through the ETI session. The ETI session must be established by the **direct trading participant** of EEX before placing an order, as orders and trades **cannot** be processed without it.*

*To configure the ETI session, please visit the [Member Section client portal](#).*

*If you have any questions regarding the ETI sessions, please reach out to [isv@eex.com](mailto:isv@eex.com).*

### 3. What is the process for obtaining access to the order book through other ISVs?

*Please contact the respective ISV provider for further information.*

### 4. When is the order book available?

*Following consultation with the market and with the aim to pool liquidity, the order book will be available only between 16:00 and 18:00 JST (09:00 to 11:00 CEST and from 08:00 to 10:00 CET) on EEX exchange days.*

### 5. What are the costs associated with accessing the order book?

*The standard [trading](#) and [clearing](#) fees for EEX Japan Power Derivatives apply, please refer to the respective price list.*

### 6. Which products are enabled for the order book?

*The central limit order book will be enabled for all Japanese Power Derivatives listed on the European Energy Exchange (EEX). Japanese Power options are not available in Touchpoint for*

*order book trading. If you wish to enter orders for Japanese Power options, please use a different ISV or T7.*

## 7. How can I control the risk limits, and what types of risk limits are available?

*In Touchpoint, Clearing Members and NCMs can set **lot per trade limit** and **stop limits**.*

*The “stop limit” allows you to bar participants from trading specific products, market areas, or trading entirely. The “lot per trade limit” enables you to restrict your customers to a specific lot size per order.*

## 8. Which spreads are offered on the order book?

*There will be location spreads between the Kansai and Tokyo areas, as well as time spreads available in T7 (Eurex). Please contact the respective ISV provider for further information.*

## 9. What are the mistrade rules?

*In case of a mistrade, an objection shall be made without delay, within 10 minutes after execution by contacting **EEX Market Operations** by telephone (please find the contact details below).*

*The objection may only be made by the party involved in the relevant transaction who caused the erroneous entry.*

*For example: by executing clearing member, by a trading broker or a direct trading participant (NCM).*

*If the deal was entered by an agency client, the agency client must contact the relevant direct trading participant to report the objection to the EEX Market Operations team.*

*Further information on trade cancellation rules can be found [here](#).*

*Please note that in the case of a mistrade, a trade cancellation fee applies according to the [EEX price list](#).*

## 10. When does EEX accept a mistrade?

*In case of an incorrect price, which means that the trade price significantly differs from the fair market price.*
