A. Subject of the Contract and Underlying

1. Power

At the EEX OTF, financial and physical power futures can be traded:

1.1 Underlying

Delivery and acceptance of power with a constant output of 1 MW into the maximum voltage level of the corresponding market area during the delivery time on every delivery day throughout the delivery period.

1.2 Market areas/reference contract

1.2.1 Power Futures with Physical Fulfilment

Power futures with physical delivery can be traded for the following market areas:

- Germany (EEX German Power Base and Peak OTF Futures),
- France (EEX French Power Base and Peak OTF Futures),
- Austria (EEX Austrian Power Base and Peak OTF Futures).

1.2.2 Power Futures with Financial Fulfilment

Power Futures with financial settlement can be traded for the following market areas:

- Germany/Austria (EEX German/Austrian Power Base and Peak OTF Futures).

1.3 Delivery time

The delivery time comprises the following days and hours in the delivery period of the corresponding contract:

1.3.1 Base

00:00 to 24:00 for all days of the week

1.3.2 Peak

08:00 to 20:00 for all days from Monday to Friday

1.4 Delivery period/time period

Delivery periods for the respective market area are: months, quarters and years.

1.4.1 Physical Power Futures

- EEX Austrian Power Base Month/Quarter/Year OTF Futures
- EEX Austrian Power Peak Month/Quarter/Year OTF Futures
- EEX French Power Base Month/Quarter/Year OTF Futures
- EEX French Power Peak Month/Quarter/Year OTF Futures
- EEX German Power Base Month/Quarter/Year OTF Futures
- EEX German Power Peak Month/Quarter/Year OTF Futures

1.4.2 Financial Power Futures

- EEX German/Austrian Power Base Month/Quarter/Year OTF Futures
- EEX German/Austrian Power Peak Month/Quarter/Year OTF Futures

1.5 Contract volumes and minimum lot size

- Contract volumes:
The contract volume is established on the basis of the number of delivery hours (h) during the delivery period multiplied by the constant output specified in the respective reference contract (MW). The maximum power volume per day during the delivery period is usually 24 MWh or 25 MWh or 23 MWh upon the change from and to daylight savings time.

- Minimum lot size:
 - 1 contract or a multiple thereof

1.6 Tradeable maturities

At a maximum, the following maturities can be traded at the EEX OTF:

- Month Futures:
 - the current and the next 9 months
- Quarter Futures
 - the respective next 11 full quarters
- Year Futures
 - the respective next 6 full years

The exact number of the tradeable maturities is specified by the EEX Management Board of the Exchange and announced before their introduction.

2. Natural Gas

2.1 Underlying

Delivery or acceptance of delivery of natural gas in compliance with the respective valid terms and conditions of the Market Area Manager or Transmission System Operator (TSO) of the concerned market areas, as the case may be, with a constant output of

- 1 MW (ETF, CEGH VTP, GASPOOL, NCG, PSV, TTF, ZTP),
- 1 MWh/day (PEG) and
- 1,000 therm/day (≈ 29,307.1 MWh/day) (NBP, ZEE),

respectively, during the delivery time of any given delivery day of the delivery period at the respective virtual trading point.

2.2 Market Areas

- CEGH VTP – operated by Central European Gas Hub AG for Austria;
- ETF – operated by Energinet.dk, natural gas Transmission System Operator for Denmark;
- GPL – operated by GASPOOL Balancing Services, Market Area Manager for Germany;
- NBP – operated by National Grid, natural gas Transmission System Operator for the GB
- NCG – operated by NetConnect Germany GmbH & Co. KG, Market Area Manager for Germany;
- PEG – operated by GRTgaz and Teréga, natural gas Transmission System Operators for France ;
- PSV – operated by Snam Rete Gas, natural gas Transmission Systems Operator for Italy;

- [TTF – operated by Gasunie Transport Services B.V., natural gas Transmission System Operator for the Netherlands;](#)
- [ZEE – operated by Fluxys, natural gas Transmission System Operator for Belgium;](#)
- [ZTP – operated by Fluxys.](#)

2.3 Delivery Periods and Delivery Time

[The delivery periods with the respective delivery times for the respective market area may be:](#)

[Month: delivery time from 06:00* of each delivery day of the delivery month until 06:00* of the following calendar day;](#)

[Quarter: no delivery but cascading according to Sect. D.2;](#)

[Season**: no delivery but cascading according to Sect. D.2;](#)

[Year: no delivery but cascading according to Sect. D.2](#)

* [All times in CE\(S\)T.](#)

** [Season comprises either the months October to March \(Winter Season\) or the months April to September \(Summer Season\).](#)

2.4 Tradable Delivery Periods

2.4.1 Physical Natural Gas Futures

- [EEX CEGH VTP Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX ETF Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX GPL Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX NCG Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX NBP Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX PEG Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX PSV Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX TTF Natural Gas Month/Quarter/Season/Year OTF Futures](#)

2.4.2 Financial Natural Gas Futures

- [EEX ZEE Natural Gas Month/Quarter/Season/Year OTF Futures](#)
- [EEX ZTP Natural Gas Month/Quarter/Season/Year OTF Futures](#)

2.5 Contract Volume and Minimum Lot Size

- [Contract volume:](#)

[The contract volume is calculated by multiplying the number of delivery days in the delivery period with the quantity to be delivered daily. This quantity generally amounts to 24 MWh. In all market areas other than PSV, this quantity amounts to 23 MWh on the day of the switch from winter time to summer and 25 MWh on the day of the switch from summer time to winter time.](#)

In the market area PEG the contract volume amounts to 1 MWh to be delivered at any time during each delivery day in the delivery period.

In the market areas NBP and ZEE the contract volume amounts to 1,000 therm to be delivered at any time during each delivery day in the delivery period.

- Minimum lot size:
 - 1 contract or a multiple thereof

2.6 Tradable Maturities for Futures

At maximum the following maturities can be traded at EEX:

2.6.1 Month Futures

- The respective next 6 full months.*

* All transactions in EEX TTF Natural Gas Month Futures that would exceed the admissible number of consecutive delivery months will be cancelled by the Management Board of the Exchange. For instance, a transaction on the next 7 delivery months (M+7) would exceed the admissible number of “the respective next full 6 months” and will therefore be cancelled.

2.6.2 Quarter Futures

- The respective next 11 full quarters (EEX TTF Natural Gas Quarter OTF Futures).
- The respective next 7 full quarters (all other EEX Natural Gas Quarter OTF Futures).

2.6.3 Season Futures

- The respective next 6 full seasons

2.6.4 Year Futures

- The respective next 6 full calendar years

The exact number of the tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

B. Pricing and price changes

1. Euro Denominated Products

Prices are established in EUR per

- MWh to the second with two decimal placed digits after the point (EEX Power OTF Futures);
- MWh to the third decimal place (products in natural gas except EEX NBP and ZEE Natural Gas OTF Futures).

Minimum price change:

- EUR 0.01 per MWh
- EUR 0.005 per MWh¹ (EEX Natural Gas OTF Futures except EEX NBP and ZEE Natural Gas OTF Futures)

The minimum price change per contract is based on the factor of the minimum price change per unit and contract volume or the number of delivery hours.

2. GBP Denominated Products

Pricing in

- GBP Pence (GBp) per therm to the third decimal place (EEX NBP and ZEE Natural Gas OTF Futures)

Minimum price fluctuation:

- GBp 0.005 per therm¹ (EEX NBP and ZEE Natural Gas OTF Futures)

¹ For Trade Registration, the Minimum Price Fluctuation is EUR 0.001 per MWh and GBp 0.001 per therm, respectively.

C. Last Trading Day

1. Power Futures with Physical Settlement

The following are the last trading days for the:

- **Month Future**
The third Exchange Day before the beginning of the delivery period.
Trades can be registered in the framework of the risk management during the delivery period until the time specified under 2.1 by ECC AG as the central counterparty or by Clearing Members also with regard to Non-Clearing Members. Otherwise, Month Futures cannot be traded during the delivery period.
- **Quarter/Year Future**
The third Exchange Day before the beginning of the delivery period.

2. Power Futures with Financial Settlement

The following are the last trading days for the

- **Month Future:** The day on which the hourly auction/s for the last delivery day of the delivery period is/are carried out at the EPEX Spot Market. Trading ends at the time at which the submission of bids for the hourly auction/s of the EPEX Spot Market ends on that day (usually 12:00).
- **Quarter/Season/Year Future:** The third Exchange Day before the beginning of the delivery period.

3. Futures on Natural Gas

The Last Trading Day of the:

- Month Future is two Exchange Days before the first delivery day of the delivery month.
- Quarter/Season/Year Future is the third Exchange Day before the beginning of the delivery period.

If one of the above-mentioned last trading days is not an EEX Exchange Day, the preceding Exchange Day is the last trading day.

D. Fulfilment

1. General Provisions

1.1 Financial Fulfillment

Billing and payment in connection with the fulfillment of futures as well as payment of option premiums shall be effected between the Clearing Members and ECC AG in accordance with more detailed provisions in the Clearing Conditions. Billing and payment to Non-Clearing Members and own customers shall be the responsibility of the responsible Clearing Member; billing and payment of Non-Clearing Members to their customers shall be the responsibility of the Non-Clearing Members.

1.2 Physical Fulfillment

Delivery and acceptance of delivery shall be effected directly between the respective Settlement Entity of ECC and the respective EEX OTF Participant in accordance with more detailed provisions in the Clearing Conditions; delivery and acceptance between an EEX OTF Participant and its customer shall be the responsibility of the EEX OTF Participant.

1.2. Cascading

For the following Future contracts longer maturities cascade into corresponding shorter maturities:

- Power Futures
- Natural Gas Futures.

On the third ECC Business Day before the beginning of the delivery period, each open position in a Year Future is replaced by equivalent positions in the three Month Futures for the delivery months from January through to March and the three Quarter Futures for the second through to the fourth delivery quarter whose delivery periods together correspond to the delivery year.

On the third ECC Business Day before the beginning of the delivery period, each open position in a Season Future is replaced by equivalent positions in the three Month Futures for the delivery months from October through to December (Winter-Season) or the three Month Futures for the delivery months from April through to June (Summer-Season) and the respective following Quarter Future.

On the third ECC Business Day before the beginning of the delivery period, each open position in a Quarter Future is replaced by equivalent positions in the three Month Futures whose delivery months together correspond to the delivery quarter. On the last trading day, every open position in a year future is replaced by identical positions in the three corresponding month futures for the delivery months from January to March and three corresponding quarter futures for the second through to the fourth delivery quarter whose delivery periods taken together correspond to the delivery year.

On the last trading day, every open position in a quarter future is replaced by identical positions in the three corresponding month futures whose delivery months taken together correspond to the delivery quarter.

2.3. Power Futures

2.13.1 Final Settlement Day

The following are the final settlement days

- for **physical power futures** (Month Futures): The day on which the hourly auction/s for the last delivery day of the delivery period is/are carried out at EPEX SPOT.
- for **financial power futures** (Month Futures): The ECC business day after the last trading day; if the right to physical fulfilment is exercised, two ECC business days before the beginning of the delivery period.

Credits and debits are effected in accordance with the more detailed provisions in the Clearing Conditions on the ECC business day after the final settlement day.

2.23.2 Final Settlement Price

2.2.13.2.1 Physical Power Futures

The respective final settlement price is determined in accordance with the section below.

2.2.23.2.2 Financial Power Futures

As a rule the respective final settlement price is determined with the help of an index as determined by an Index administrator which is derived from the average of all auction prices of all traded day-ahead hour contracts for the respective market area and for the respective delivery time (base/peak) during the respective delivery period.

~~If, by way of exception, the final settlement price is determined on the basis of several indices (scil. results of several auctions) and, in particular, in the case of the — even subsequent — introduction of congestion management between two or more market areas (bidding zone split), the Management Board of the Exchange can determine a weighting of the indices for the respective market areas (e.g. Germany and Austria for the determination of the Phelix-DE/AT Futures) for the calculation of the final settlement price. This specification should, in particular, consider the proportion between the respective market areas' capacities — for example with regard to annual average values of generation and consumption. The Management Board of the Exchange will annually review this specification as of 30th June — however, for the first time in 2020. If the facts decisive for a specification have changed significantly at a subsequent time, the Management Board of the Exchange is entitled to specify a new weighting based on these changes with uniform effect for all delivery periods beginning on the following 1st January.~~

~~In principle, the auction prices at which the day-ahead hourly contracts are traded at the power spot exchange with the highest liquidity (reference price) are used as the index for the final settlement price. At present~~Currently, the final settlement price reference price has the following basis for the following market areas:

- Germany: is based on the respective spot market index as determined by EPEX Spot for this market area~~The hourly prices determined by EPEX SPOT for the market area comprising the balancing area operated by Amprion GmbH (AMP);~~
- Germany/Austria: is based on the respective spot market index as determined by EPEX Spot for this market area~~The hourly prices determined by EPEX Spot for this market area/these market areas;~~
- France: is based on the respective spot market index as determined by EPEX Spot for this market area~~The hourly prices determined by EPEX Spot for this market area;~~
- ~~Austria: is based on the respective spot market index as determined by EPEX Spot for this market area~~~~The hourly prices determined by EPEX Spot for the market area comprising the balancing area operated by Austrian Power Grid AG (APG).~~
- ~~The EEX Management Board of the Exchange can use indices provided by information and/or data providers or another suitable source in the event that exchange data are not available. In these cases, EEX shall publish the name of the source which is used for calculating the index.~~

2.33.3 Fulfilment of Physical Power Month Futures

Fulfilment is effected once the following contract performance elements have been cumulatively achieved; partial performance does not lead to the fulfilment of the contract.

2.3.13.3.1 Final Variation Margin

The seller (buyer) is obliged to settle the difference between the agreed price and the higher or lower final settlement price in cash. The final settlement price can be negative.

2.3.23.3.2 Physical delivery, acceptance and payment of power

To execute physical delivery and acceptance, European Energy Exchange AG enters in correspondence to the participants positions bids for day-ahead hourly contracts at EPEX on a daily basis throughout the delivery period of the contract without a price limit ("Market Order") in the name and on behalf of the OTF participants. The bids At EPEX are automatically entered on a mandatory basis throughout the delivery period outside the control of the OTF participants. The bids are binding for the OTF participants; they are considered in the EPEX auction process and executed at the market price determined by EPEX in accordance with the EPEX SPOT rules and regulations.

As a result, according to the more detailed provisions in the ECC Clearing Conditions, the seller is obliged to deliver the agreed volume of power with a constant output and duration through schedule nominations in the balancing area; while the buyer is obliged to accept the required volume of power through corresponding schedule nominations in the balancing area and to pay the purchase price for it on every delivery day of the delivery period. Thus, physical power delivery and acceptance are effected in accordance with the ECC Clearing Conditions and the balancing agreement of the respective transmission system operator by submitting a schedule or nomination in line with the requirements of the respective balancing agreements as well as the binding confirmation of the schedule or the nomination by the transmission system operator.

2.3.33.3.3 Non-assignable incapacity for physical delivery and acceptance

An incapacity for physical delivery is in particular outside the control of the OTF if the bids of the OTF participants are not executed at EPEX. In this case, the requirement for physical delivery ceases to apply. This shall not prevent a contract from being considered as physically settled in terms of Annex I Section C Number 6 of the Regulation 2014/65/EU.

2.43.4 Fulfilment of financial Power Month Futures

The seller (buyer) is obliged to settle the difference between the price agreed and the higher (lower) final settlement price in cash. If the final settlement price is determined on a Saturday, Sunday or a holiday following a Sunday, cash settlement is only effected on the second ECC business day after the last trading day. The final settlement price for power futures can be negative.

4. Futures on Natural Gas

The buyer is obliged to accept the delivery and pay for the quantity of natural gas agreed upon during each delivery hour and/or day within the respective delivery period.

The seller is obliged to deliver the agreed quantity of natural gas during the entire delivery month on each delivery day.

4.1 Delivery and Acceptance of Delivery

The delivery and acceptance of delivery is effected, subject to the provisions contained in the Clearing Conditions, by submitting a nomination or schedule in accordance with the requirements of the respective Balancing Agreement, which comprises the underlying delivery transaction as well as the binding confirmation of the nomination or schedule by the respective Market Area Manager or Transmission System Operator (TSO). On every delivery day of the delivery period, only that part of the contract shall be delivered which has been defined for delivery according to the respective contract specifications.

4.2 Purchase Price

The purchase price for derivatives market transactions for all delivery days in the entire delivery period is the final settlement price. The final settlement price is the settlement price determined on the Last Trading Day (Month Future).

4.3 Special Provisions for Financial Natural Gas Futures for the Market Areas ZEE and ZTP

Close-out agreements can be concluded with the Clearing House enabling the member not to enter into physical delivery.
