

EEX to introduce next Global Vision release (8.12.30) on 13th July 2021

Dear trading participant,

EEX will update its Global Vision trading system used for EEX Gas Spot products from version 8.12.24 to version 8.12.30.14235 on 13th July 2021. This release will be done during our monthly maintenance. Detailed timing will be communicated before the maintenance.

The main technical change is the new 64-bit operating systemsⁱ that replaces the 32-bit one and improve performances. There are no functional changes for traders in this version and no impact is expected.

You can use our simulation environment which is already updated to version 8.12.30 if you wish to by connecting to:

gv.simu.powernext.com

Please do not hesitate to contact us if you should have questions.

Yours sincerely,

EEX Market Operations
