

Changes to the publication of EEX EGSI

Dear Trading Participant,

EEX AG is pleased to announce that **its European Gas Spot Index (EEX EGSI) is now available within all EEX Group DataSource services and directly on EEX's website via the data widgets.**

On 30 December 2022, the EEX EGSI revised methodology was introduced. Until now, EEX EGSI has been available on the EEX website through downloadable files. However **with the integration of EEX EGSI data widgets on the EEX website, these downloadable files will be discontinued from 31 March 2024.** Until then, the files will continue to be updated and available for download.

In addition to the website, the EGSI values can now be retrieved through EEX DataSource services: EEX Group DataSource API, EEX Group DataSource sFTP, EEX Group DataSource Desktop App and EEX Group DataSource XLS Tool.

Please note that **EEX EGSI access on the sFTP server will be granted free of charge, to all existing customers, until 31 December 2023.**

From 1 January 2024, customers with:

- **an existing paid subscription** to EEX End of Day (EoD) or EEX EGSI, contracted before 31 December 2022, will benefit from a free of charge EEX EGSI access on the sFTP server until further notice;
- **no existing paid subscription** to EEX EGSI can subscribe to EEX EGSI (with an associated cost).

Should you need to retrieve EEX EGSI data for internal usage, please do not hesitate to subscribe directly via the [EEX Group Webshop](#). Should you wish to share EEX EGSI data with affiliated companies or clients as external usage, please reach out to [EEX Market Data Services](#).

Europe's most transparent natural gas indices

With the above integrations, which make indices even easier to access, EEX AG continues to build markets together with its trading participants.

Thanks to multiple natural gas spot indices, each tailored to specific market needs, EEX AG provides Europe's most transparent and trustworthy set of natural gas reference prices. Being based on thousands of on-screen exchange trades per day from more than 200 active market participants, EEX AG's indices are robust, transparent, and reliable. This index portfolio has recently also been extended with HYDRIX – Europe's first market-based hydrogen index.

Get more information and a complete overview of EEX Natural Gas Indices here or visit the EEX European Gas Spot Index price site directly.

Yours sincerely,

European Energy Exchange
