

## Changes to the Publication of Agricultural Indices

Dear trading participant,

EEX AG is pleased to announce that its Agricultural Indices are now available within all EEX Group DataSource services and directly on EEX's website via data widgets.

Since the introduction of agricultural commodities for trading in 2015, the underlying indices have been made available on the EEX website through downloadable files. However, with the integration of EEX Agricultural Index data widgets, these downloadable files will be discontinued from 31 March 2024 with the exception of the EEX European Processing Potato Indices. Until then, the files will continue to be updated and available for download.

In addition to the website, the index values are also available within all [EEX Group DataSource Services](#) for your analytics and integration purposes.

Should you wish to retrieve the Agricultural Indices for internal usage, please do not hesitate to subscribe directly via the [EEX Group Webshop](#). Should you wish to share the data with affiliated companies or clients for external usage, please reach out to [EEX Market Data Services](#).

Please note that the EEX Weekly European Cheese Indices (WECI) will continue to be only available through a downloadable file on our website.

Please do not hesitate to contact us in case of any further questions.

Yours sincerely,
