# Amendment of Implementation Regulation of the Order Transaction Ratio

Dear Trading Participants,

Effective as of 1 October 2024, the Implementation Regulation of the Order Transaction Ratio document (version 004a) has been amended and published.

Trading participants are obliged to maintain an adequate ratio between their order entries, order changes, and order deletions and their actually executed transactions (Order Transaction Ratio).

The amendment concerns the increase of the admissible quantity of ordered contracts in a product for the category "Other Products" to 25,000 and the inclusion of agricultural products into that category.

The new version of the Implementation Regulation is available under EEX Rules & Regulations.

Yours sincerely,
