EEX optimizes trading by increasing transaction size limit

Dear Trading Participants,

Effective from **1 December 2025**, trading and the trade registration services for all EEX derivatives contracts will be further streamlined.

Following the increased liquidity and the size of trades in certain products (PVB and PEG), the maximum lot size on all Futures markets will be raised from 10,000 lots to 200,000 lots.

Trading participants and their Clearing Members can lower the above transaction size limits compared to those set by EEX, if required. For trading participants or Clearing Members with already **set limits**, those will continue to apply. Further details can be found in the T7 Release 14.0 – Trader, Admin and Clearer GUI.

This change does not impact the T7 Pre-Trade Risk Limits.

EEX will continue to monitor the developments and increase this technical limit further in the future, as required.

Please do not hesitate to contact us or your Key Account Manager if you have any further questions.

Yours sincerely,

EEX Market Operations/Gas Market Operations
