EEX to extend Inter-Product spreads for GO Futures

Dear trading participants,

EEX will expand GO Power Futures trading with Inter-Product Spreads, starting on 17 November 2025, complementing the existing Time Spread functionality. Time Spreads allow the simultaneous buying and selling of different maturities within GO products, while Inter-Product Spreads will facilitate trading between different GO products, enabling market participants to effectively capture price differences across maturities and different technology GO products.

The following combinations are available:

Time Spreads (available already)	Inter-Product Spreads (available from 17.11.2025)
Yearly contracts 1st to 4th expiry: • Cal Jan26 – Jan27 / Jan28 / Jan29 • Cal Jan27 – Jan28 / Jan29 • Cal Jan28 – Jan29	Any technology GO and all technology GO: • EGOE – EGOW / EGOH / EGOS • EGOH – EGOW / EGOS • EGOW – EGOS

For GO product codes and contract specifications, please refer to https://www.eex.com/en/markets/energy-certificates/go-futures

With the launch of the state-supported and unsupported Wind-Hydro-Solar (WHS) GO Futures on 8 December 2025, additional Time Spreads will be tradable from day one while the Inter-Product Spreads will follow in Q1 2026.

In partnership with IncubEx, EEX will continue to expand its GO product range in the first half year of 2026 such as further maturities and finer granularities.

Yours sincerely,

EEX Market Operations
