Update of Trading System Eurex T7 to version 4.0

Dear trading participant,

In line with the Eurex Exchanges' release cycle, the EEX Derivatives Trading System Eurex T7 will be updated to **version 4.0** as of **21 November 2016**.

The simulation period for T7 Release 4.0 is currently scheduled to start on 23 September 2016.

For EEX customers there are no functional changes associated with this release. Furthermore, EEX will take care that the connection via EEX GV Portal and EEX TT Screen is updated accordingly. There is no to do for customers accessing the EEX markets via this connections.

Nevertheless, there are two changes which might have impact:

- The native T7 Trader GUI will only work with JAVA version 8 or higher (further described below)
- EEX will **not** migrate the Trade Entry Service functionality to T7 (as Eurex does). The respective current interfaces (to Eurex classic clearing system) will remain unchanged

Technical enhancements

- **Mandatory Java 8 Update**

For T7 Release 4.0, the installation of Java 8 (minimum: Version 8 Update 73) for the Eurex T7 Trader GUI and Eurex T7 Admin GUI on the participants' side is mandatory. The usage of the GUIs with older Java versions will not be possible. In the event that the correct Java version is not installed, the respective Eurex T7 Trader GUI and Eurex T7 Admin GUI will not start.

- **API Enhancements**

Please be aware of several API changes which might affect you. For further details, please see the API description of Eurex T7 release 4.0.
