Update of Trading System Eurex T7 to version 4.0

Dear trading participant,

EEX will update its T7 Trading System to version 4.0 on 21 November 2016. While there are no functional changes for EEX customers included, we would like to make you aware of the following technical details:

- The native T7 Trader GUI will only work with JAVA version 8 or higher
- EEX will **not** migrate the Trade Entry Service functionality to T7 (as Eurex does). The respective current interfaces (to Eurex classic clearing system) will remain unchanged

Furthermore, please note that the native T7 Trader GUI is available via a new landing page:

- Via Internet: <http://webgui.eurexchange.com/eex/>
- Via Leased Line: <http://webgui.vpn.eurexchange.com/eex/>
- URL to the JLNP file for trader GUI:
<http://webgui.eurexchange.com/production/eurex-trader-eex/eurex-trader-eex.inlp>
- URL to the JLNP file for Admin GUI:
<http://webgui.eurexchange.com/production/eurex-admin-eex/eurex-admin-eex.inlp>

All details regarding the update are available in customer information 20160825.

Please do not hesitate to contact us at +49 341 2156 222 if you have further questions.

Yours sincerely,

Market Supervision Team
European Energy Exchange AG
